

# INTERVAL CHART

I have found it helpful to memorize a song title that begins with a certain interval. For instance, the interval of a perfect 4th is the first two notes of *Here Comes the Bride*. By singing the first two notes of *Here Comes the Bride* and realizing it outlines a perfect 4th interval you can begin to center in on perfect 4th's whenever they are sounded. Or, it may help you to actually sing, or play on your instrument, in tune, the interval of a perfect 4th.

Each of these songs begins with the interval listed TO THE LEFT.

**I like to use the following table as a guide to identify correctly whatever interval is being played:**

I am listing intervals that correspond with standards or kiddie tunes of the past 40 years. If you are not familiar with these songs, they probably won't help you in identifying intervals. In that case, I suggest you write down song titles that you are familiar with, such as current commercials on TV or radio, pop songs, religious songs, or anything that begins with an interval you need to work on. It is usually harder to find songs that begin with descending intervals.
